

PRODUCT CHANGE NOTICE

Issue Date: April 9, 2015

Notification No: PCN-1503008

Models Affected:

- MGT Milenium series taps
 - MGT2xxx-SE/x, MGT3xxx-SE/x, MGT2xxx-SDPE/x
- Retrofit series taps
 - RRT1xxx, RPT1xxx
- Milenium line passives
 - MGPIH-2000xx, MGDCH-21xxF, MGLSH-xF, GLPIH-2000x, GLDCH-21xx, GLSH-x

Description of Change:

The former aluminum hex port plugs have a clear trivalent chromate finish. During the production process, the port plug undergoes an acid wash and an alkaline wash. To reduce the environmental impact on production and waste water from the acid/alkaline wash, we converted the polishing process to a vibrational tumbler. The trivalent chromate finish remains the same but the port plug will have a darker finish.

Before

After

Additional Information:

No impact to fit, form and function. No impact to salt fog corrosion resistance. No impact to water seal.
